

Note: This map was developed using site suitability criteria in Volume 5 of Ecology's Stormwater Management Manual for Western Washington (2012) Volume III and V. The map is intended for planning purposes only.

The GIS analysis included the following:

Site specific analysis is required prior to design and construction to evaluate the following (data available on the geospatial tool have an asterisk):

- Facility setback from property line
- Setback from vegetation buffer
- Setback from structures
- Setback from top of slopes > 15%
- Maximum contributing impervious area

NONE
